

Öykü Gökçek

I am a tenacious problem solver with a strong background in research, report generation, laboratory analysis and plant operating design. After my engineering education, I have been interesting in object-oriented programming and 3D design. In this way, I developed time management by thinking algorithmically. I give particular importance to details and have no difficulty in taking initiative.

Aiming to be a chemical engineer who prioritizes the environment, human rights and ethical rules also having a command of the production processes in my field, observing the needs of both the industry and the market. I am currently working as a freelancer in a factory laboratory that produces construction chemicals.

Education

2021 - ...	İzmir Institute of Technology Software Engineering and Data Science
2015 - 2021	Hacettepe University Chemical Engineering
2010 - 2014	Muğla Gazi Anatolian High School

Work Experience

Şub 2022 - Nis 2022	EMS Makina Quality Control Manager
---------------------	--

I was responsible for the control of welding and painting of structural steels in the company that produces on vehicle equipment. I was particularly interested in developing procedures the preliminary welding procedure document which is prepared according to international standards.
